

200 Mbps PLC A REALITY NOW

Another year, and thanks to our customers' continuous support, we have the pleasure to invite you to visit our booth at CeBIT 2004. Come and let us show you our latest generation products, including chipsets capable of offering 200 Mbps data rate for access and in-home applications; broadband access infrastructure equipment, multiple streams of Audio-Visual (AV) content: HDTV, SDTV and video on demand for home entertainment.

Come and see the WORLD'S FIRST industrially available and commercially deployable PLC-technology capable of AV-speeds, in which DS2 has become the most cost effective solution offering the highest performance. Let us share with you our vision for PLC-access and in-home distribution of audio/video content.

Don't miss the opportunity to see for yourself the most impressive demo of PLC technology in the world! We look forward to meeting you in Hannover.

Date: March 18 - 24, 2004

Our Booth: Stand No.A66

Location: Hall 12

You are invited!!
